

Your Silver Shield sensor is here!

Today is the day your Silver Shield sensor will be installed.

Here's what this smart sensor brings to your room:

Instant alerts to care staff if you fall

Total privacy - no cameras or microphones

Fully automatic – no wearables or buttons needed

Note: The sensor will begin learning the layout of your room right away.

Fall detection will be activated once the team has completed setup and received your Informed Consent.

Have questions?

Just ask your caregiver, or scan this QR code to watch a quick 1-minute explainer video.

In the meantime, relax — Silver Shield is here to help.
